Comment: In respect to Executive Summary item 3.8 Reallocation of Water Storage in Federal Reservoirs, I offer the following. Based on observation and experience, and given the diverse water needs in the state, I believe that it is a significant deficiency and omission to not include an active and aggressive effort to reauthorize water storage from federal reservoirs as part of the current water plan effort. My reasons and rationale are too numerous to mention here, but I would be pleased to discuss this item with the Water Plan personnel.
