

## **Water Supply Availability Work Group**

### **Surface Water Subgroup**

#### **May 21, 2013 - Meeting Summary**

#### **Conference Call**

The first meeting of the Surface Water subgroup was held May 21, 2013 via conference call. The following were in attendance: Roger Dodds, Cynthia Edwards, Randy Easley, Chris Soller, Dale Kimbrow, Brian Culpepper, Tim Shaw, Robert Hart, Chad Dulaney, Edward Swaim, Tony Ramick, Jaysson Funkhouser, Nicole Rowan, Evan Teague, Charles Glover, and Dennis Carmen.

The purpose of the call was to discuss next steps for the surface water availability subgroup and receive feedback on the methods presented at the April 25, 2013 Water Supply Availability Work Group meeting. Roger Dodds provided an overview of the information presented at the April 25th Work Group Meeting and provided an example of how excess surface water calculations will be completed as part of the Water Plan Update.

Following were the questions and comments discussed during the call:

- Question: Will excess surface water on the Arkansas River be examined. Answer: Yes, the calculations from the 1990 plan will be updated.
- Comment: The Arkansas Department of Environmental Quality sometimes applies seasonal 7Q10s in its permits. Check with them to see if these impact any of our excess surface water locations.
- Comment: The water balance between surface water and groundwater should be explained.

The subgroup will meet again after the results of the surface water analysis is completed.
