Subject: Arkansas Water Plan comment

Mr Smith,

Hello, a fax has been sent responding for the AWP public comment period. The AWP includes a range of public and professional responses.

The fax concluded a brief statement of an additional aspect concerning the plan conclusions. The AWP has thoroughly researched the State of Arkansas for future needs.

The plan for water resources can be conserved, given standards are adhered and best management practices provided.

Thank you for the AWP research.

Respectfully,
MichaelS
